# We are engaged in support activities based on the Convention on the Rights of the Child.

What can we do without pressuring children or yourself? Shall we find out together?

Peer Support Cuddle Cafe

We provide support by empathizing with families' feelings and sharing information about community spaces and free schools as needed. We conduct cafe-style discussions and also hold online cafes as necessary.

Space for Children and Adults, "Kadoru Hiroba"

We create a place where individuals are accepted for who they are. We operate activities indoors and outdoors where both children and adults can feel secure, gradually become accustomed to the space and people, and find opportunities they "want to go to."

Educational Activities for Government and Local Communities

We convey the feelings of children with school attendance issues and the thoughts of their families, proposing mechanisms for schools where everyone can be themselves. In addition to working with local authorities, we conduct activities such as lectures and independent film screenings, reaching various regions and age groups.

Support for Parents Raising Children

We provide support for parents raising children through our cafe services.
